

Aquion

Water Treatment Products

One Year Dealer's Service Policy

To the original purchaser of the Aquion equipment, we positively guarantee material and workmanship to be free of defects, and will repair or replace, without cost to you, for a period of one year after purchase, any part or portion which our examination shall disclose to be defective.

A charge will be made for service required because of misuse, alteration, freezing, neglect, accident, foreign matter, change in water content, customer error, customer imagination, or other causes beyond our control.

A charge will also be made if we are asked to perform work that is your responsibility.

IF YOU OWN FULLY AUTOMATIC EQUIPMENT, THE FOLLOWING ITEMS ARE YOUR RESPONSIBILITY:

1. Setting of timer to correct time and correct day.

Time may be incorrect due to interruption of electricity, blown house fuse, loose or pulled plug, defective outlet box, or change from Daylight to Standard Time or vice versa.

2. Setting of regeneration time.

If time of regeneration is not suitable, you may wish to change regeneration time.

3. Setting number of regenerations per week.

You may need to increase number of regenerations:

- (1) If you use more water than we originally estimate you would,
- (2) If there is an increase in the number of people in house, or
- (3) If there is an increase in the hardness or iron content of water.

4. Regenerating manually, when necessary.

If you have house guests, or for other reasons use more than normal amounts of water, you may need to regenerate an extra time, manually.

INSTRUCTIONS FOR THE ABOVE ARE INCLUDED WITH YOUR UNIT. LET US KNOW IF YOU DID NOT RECEIVE THEM.
